

# SECURE DIMENSIONS

Secure operations and explore new Dimensions of innovation and resilience

# About Us

We are a cybersecurity consulting firm based in Saudi Arabia, offering tailored programs, innovative products, expert consultation, and professional services.

Our solutions are designed to enhance your organization's security, ensure compliance, and drive operational resilience. Partner with us to Build a resilient future while unlocking new opportunities for innovation.

## **Mission**

Our mission is to delivering top-notch cybersecurity services at an affordable cost to establish a secure environment for our clients.

## **Vision**

Our vision is to emerge as one of the top companies in the region offering cybersecurity services and solutions, and to be listed on the Saudi Stock Market.

# Cybersecurity Services

# GRC Program

الهيئة الوطنية للأمن السيبراني  
National Cybersecurity Authority

## NCA Compliance

We assist organizations in achieving NCA compliance by providing tailored guidance on regulatory requirements, gap assessments, and strategic compliance planning.

هيئة السوق المالية  
Capital Market Authority

## CMA Compliance

We support organizations in meeting CMA cybersecurity requirements through customized guidance, comprehensive gap analysis, and strategic planning to ensure full regulatory alignment and risk - based implementation.

## ISO 27001 Compliance

Our services include ISO 27001 pre - certification audits and the implementation of a robust information security framework, integrating both commercial and technical processes to enhance organizational security.

البنك المركزي السعودي  
SAMA  
Saudi Central Bank

## SAMA Compliance

We empower financial institutions to assess, plan, and achieve compliance with the SAMA Cyber Security Framework. Our approach ensures the identification and mitigation of cyber risks while safeguarding information assets and maintaining the resilience of online services.

## Aramco SACS-002 Compliance

aramco 

We support organizations in aligning with Aramco's Third-Party Cybersecurity Compliance Certificate. Our services cover the implementation of cybersecurity frameworks, the development of policies and procedures, security awareness training, and thorough audit preparation to meet Aramco's rigorous standards.

## Insurance Authority Compliance

IA   
هيئة  
التأمين  
Insurance  
Authority

We help insurance companies assess, strategize, and comply with the Insurance Authority's cybersecurity requirements. Our services focus on identifying and addressing cyber risks, enhancing the protection of sensitive data, and ensuring business continuity.

## SDAIA Compliance

SDAIA   
الهيئة السعودية للبيانات  
والذكاء الاصطناعي  
Saudi Data & AI Authority

Our SDAIA compliance services go beyond PDPL, offering strategic assessments and implementation guidance for broader data protection and AI governance requirements.

## NIST Compliance

NIST 

We deliver comprehensive NIST compliance services, addressing CSF and other frameworks, with assessments, gap analyses, and customized implementation planning to meet unique organizational needs.

## SABIC Cyber Trust Compliance

سابك  
sabic 

We provide a focused approach to SABIC Cyber Trust compliance, ensuring alignment with its cybersecurity requirements. Our services include detailed policy development, security awareness programs, and pre-audit preparation to facilitate smooth adherence to SABIC standards.

# Consultation Services

## Policies and Strategy Development

Develop tailored cybersecurity policies, governance frameworks, and strategic roadmaps aligned with industry best practices and regulatory requirements to strengthen organizational security posture.

## Risk Assessment Risk Treatment Plans

Identify, analyze, and evaluate risks to critical assets and design risk treatment plans to mitigate, transfer, or accept risks, ensuring alignment with organizational objectives and compliance needs.

## Third-Party Risk Management

Help organizations manage risks associated with vendors, suppliers, and partners by designing a well-structured and practical checklist. This checklist enables systematic evaluation of third parties to identify potential vulnerabilities, ensure consistent risk assessment, and align with compliance requirements.

## Disaster Recovery and Business Continuity Plans

Design and implement comprehensive plans to ensure the organization can quickly recover and maintain critical operations during and after disruptions, minimizing downtime and financial loss.

## Incident Response Planning

Create actionable incident response strategies, including playbooks, communication plans, and roles responsibilities, to ensure a swift and effective response to cybersecurity incidents

## Compliance & Maturity Review

Conduct assessments to evaluate the organization's compliance with relevant standards, regulations, and frameworks while reviewing the cybersecurity maturity to identify improvement opportunities

## Gaps and Findings Remediation Plan

Develop structured plans and roadmaps to address and close gaps identified through audits, assessments, or compliance reviews, ensuring alignment with regulatory requirements and organizational goals

# Professional Services

## Vulnerability Assessment and Penetration Testing (VAPT)

Conduct comprehensive assessments to identify vulnerabilities and simulate real world attack scenarios, helping organizations strengthen their defenses and address security gaps proactively.

## Compromise Assessment

A proactive service that scans your environment for hidden threats, unauthorized access, and advanced malware. Ideal for detecting breaches early, validating security posture, or responding to suspected incident

## Security Architecture and Engineering

Design, implement, and optimize security infrastructure and systems to protect critical assets, ensure scalability, and align with industry best practices and compliance requirements.

## Security Awareness and Training Programs

Deliver engaging and tailored training programs to educate employees on recognizing and mitigating security threats, fostering a culture of security awareness.

## Secure Configuration and System Hardening

Implement secure configurations and hardening techniques for servers, endpoints, and networks to reduce attack surfaces and enhance overall security resilience.

## Dark web monitoring

Monitor the dark web for exposed credentials, sensitive data, or potential threats targeting the organization, enabling timely response and risk mitigation.

## Brand Protection

Safeguard your organization's brand reputation by monitoring and addressing unauthorized use, impersonation, or malicious activities targeting your brand online.

## Phishing Simulation Campaigns

Design and execute targeted phishing simulation campaigns to assess employee awareness, measure susceptibility to phishing attacks, and enhance overall cybersecurity posture through actionable insights.

# Cybersecurity Products

# Secure Passwords

## Your Ultimate Solution for Password Management

Protect Your Data with Confidence Secure Passwords is designed to securely store and manage an unlimited number of passwords for multiple users. Whether you're an individual or part of an enterprise, this robust software ensures your passwords are safe and accessible when needed.

### Key Features

#### Store Unlimited Passwords for Multiple Users

No more worrying about running out of space. Secure Passwords lets you store an unlimited number of passwords for an unlimited number of users, ensuring you never lose track of any login credentials.

#### Unlimited Users

Whether you're a small business or a large organization, Secure Passwords allows an unlimited number of users to access and manage passwords. Collaborate safely, knowing that every user can access what they need, when they need it.

#### Password Generation or Suggestions

Need a strong password? Our software can generate complex passwords for you or suggest passwords based on customizable rules, making it easier to create secure, random passwords that are hard to crack

#### User Management with Active Directory Integration

Manage your users with ease through seamless integration with up to 10 Active Directory systems. Whether you're in charge of a team or an entire organization, maintain complete control and security.

## Compliance with Password Policy and KPIs

Stay compliant with industry regulations and internal password policies. Secure Passwords helps enforce password best practices and includes a range of KPIs and dashboards, giving you real-time insights into password security and compliance.

## Offline & AirGapped System with Local Storage

For extra security, Secure Passwords can function in an offline mode, with local storage on your system. Your data stays fully air-gapped, protected from online threats and external vulnerabilities.

## Why Choose Secure Passwords?

### Enhanced Security

Stay compliant with industry regulations and internal password policies. Secure Passwords helps enforce password best practices and includes a range of KPIs and dashboards, giving you real-time insights into password security and compliance.

### Scalability

From individual use to enterprise-level deployment, Secure Passwords adapts to your needs.

### Compliance Made Easy

Maintain control over user access, passwords, and security compliance with minimal effort.
